| • JavaScript & ES6 | • NodeJS & Express.js | • Bootstrap & Foundation |
| • C#, ASP.NET | • HTML5 & CSS3 | • jQuery & jQuery UI |
| • ASP.NET MVC & ServiceStack | • SASS & LESS | • SQL Server & Oracle |
| • AngularJS | • GruntJS, Gulp & Webpack | • TeamCity, Jenkins, & Octopus |
| • KnockoutJS & BackboneJS | • Clojure & PHP | • Dapper & Entity Framework |
| • CommonJS & RequireJS | • Xamarin | • jQuery SVG and D3.js |

EMPLOYMENT

Full Stack Developer

January 2016 – Present

J.Crew, New York, New York

- Create new features and fix defects for J.Crew's primary eCommerce website (www.jcrew.com)
- Utilize BackboneJS, NodeJS, and Clojure to build responsive web applications
- Work with a cross-functional team to build and deploy new features based on business requirements
- Participate in code reviews for all pull requests across the development stack
- Assist with architectural decisions related to JavaScript development
- Deploy code to production on a daily basis on a fully agile team

Software Developer

July 2014 – December 2015

Veritix, Cleveland, Ohio

- Build modular, performant, ASP.NET and JavaScript applications using the right tools for the job
- Front end code written with technologies such as AngularJS, KnockoutJS, Require/CommonJS, Lodash, D3.js
- Lead all front end projects and efforts as well as provide support to coworkers on front end assignments
- Create and maintain end-to-end, full stack, features utilizing C# on the server side
- Manage builds with Grunt, Gulp, or Webpack & automate with TeamCity, Jenkins, and Octopus for deployments
- Built and maintain an internal HTML, SASS, and JavaScript based UI library, documentation, and style guide
- Create API web services for internal and external consumption using ServiceStack (C#), with documentation
- Maintain iOS and Android applications using Xamarin and create custom bindings from native code
- Design, create, and manage database tables with SQL and query data directly with Dapper ORM in C#
- Create mockups for user interfaces and implement them using SASS (or LESS)

Software Engineer

April 2013-July 2014

Cureo, Wooster, Ohio

- Worked with a team developing and maintaining a single page, ASP.NET MVC 5 application
- Utilized C#, Entity Framework 6, Bootstrap 3, and jQuery + jQuery UI libraries on a daily basis
- Helped to create, maintain, and document a custom open source jQuery based library, for single page apps
- Responsible for front end development, UI creation, and user experience throughout the application
- Created unit and integration tests for server side code and user interface tests for quality assurance testing
- Developed, documented, and maintained features and work flows for the application
- Created modular, feature based JavaScript iframe plugins for use on customer websites

Part-Time Lecturer

January 2014-May 2014

The University of Akron, Akron, Ohio

- Prepared lesson plans and managed content for a bi-weekly class, taught to junior and senior undergraduates
- Taught the foundations of web design/development, using HTML and CSS, with a focus on UI and UX design
- Gave weekly lectures on introductory topics as well as advanced topics as the class progressed
- Developed students design and development skills with a focus on semantic code and positive user experiences
